DETAILED ACTION

Specification

The following guidelines illustrate the preferred layout for the specification of a utility application. These guidelines are suggested for the applicant's use.

Arrangement of the Specification

As provided in 37 CFR 1.77(b), the specification of a utility application should include the following sections in order. Each of the lettered items should appear in upper case, without underlining or bold type, as a section heading. If no text follows the section heading, the phrase "Not Applicable" should follow the section heading:

- (a) TITLE OF THE INVENTION.
- (b) CROSS-REFERENCE TO RELATED APPLICATIONS.
- (c) STATEMENT REGARDING FEDERALLY SPONSORED RESEARCH OR DEVELOPMENT.
- (d) THE NAMES OF THE PARTIES TO A JOINT RESEARCH AGREEMENT
- (e) INCORPORATION-BY-REFERENCE OF MATERIAL SUBMITTED ON A COMPACT DISC (See 37 CFR 1.52(e)(5) and MPEP 608.05. Computer program listings (37 CFR 1.96(c)), "Sequence Listings" (37 CFR 1.821(c)), and tables having more than 50 pages of text are permitted to be submitted on compact discs.) or
REFERENCE TO A "MICROFICHE APPENDIX" (See MPEP § 608.05(a). "Microfiche Appendices" were accepted by the Office until March 1, 2001.)
- (f) BACKGROUND OF THE INVENTION.
 - (1) Field of the Invention.
 - (2) Description of Related Art including information disclosed under 37 CFR 1.97 and 1.98.
- (g) BRIEF SUMMARY OF THE INVENTION.
- (h) BRIEF DESCRIPTION OF THE SEVERAL VIEWS OF THE DRAWING(S).
- (i) DETAILED DESCRIPTION OF THE INVENTION.
- (j) CLAIM OR CLAIMS (commencing on a separate sheet).
- (k) ABSTRACT OF THE DISCLOSURE (commencing on a separate sheet).
- (l) SEQUENCE LISTING (See MPEP § 2424 and 37 CFR 1.821-1.825. A "Sequence Listing" is required on paper if the application discloses a nucleotide or amino acid sequence as defined in 37 CFR 1.821(a) and if the required "Sequence Listing" is not submitted as an electronic document on compact disc).

Applicable recommended headings have not been included in the Specification.

Claim Objections

Claims 8 and 9 are objected to because of the following informalities: Claims 8 and 9 recite the active inductor circuit as (L'), where claims 8 and 9 depend from claim 1 where the active inductor circuit is named as (L). Appropriate correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as being anticipated by Campbell et al. (U.S. Patent No. 5,256,991).

Claim 1:

Campbell et al. (best shown in Fig. 2) shows an active inductor circuit including first (- V2; Zin) and second inductor terminals (+ V2, Zin) for coupling to respective external terminals, the first and second inductor terminals being coupled to a first transconductance circuit (24; analogous to 14 in Fig. 1b), a second transconductance circuit (22; analogous to 12 in Fig. 1b) and a feedback circuit (26) included in the active inductor circuit, an output terminal of the first transconductance circuit (38) being coupled to an input terminal of the second transconductance circuit (34), an output terminal of the second transconductance circuit (32) being coupled to an input terminal of the first transconductance circuit via the feedback circuit (42), the active inductor circuit further including a capacitor (26 – Fig. 6) coupled between the output terminal of the first transconductance circuit (38) and the second inductor terminal (where capacitor

Art Unit: 2817

26 is coupled to the output 38 of first transconductance circuit 24 and between the second input terminal node shown as + V2 of input 34 of the second transconductance circuit).

Claim 2:

Where the first transconductance circuit (24) includes an inverter (col. 1, lines 47-49) and two resistors (64, 68 – Fig. 6).

Allowable Subject Matter

Claims 3 – 9 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Leifso et al. shows an active inductor.

Hayashi shows an active inductor.

Kovner et al. shows a synthetic inductor.

Hara shows an active inductor circuit.
